Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2154

Art Rejections:

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-10, 15-27, 32-41 and 46-52 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Aktas, U.S. pat. No. 6,438,216.

Per claims 1-8, Aktas discloses a system and method for providing non-intrusive notifications to users comprising:

a) a first program at a controller (40, fig.1) for receiving notification alerts from the plurality of sources, generating

Art Unit: 2154

notifications and delivering notifications (see col 4, lines 49-61),

b) a second program at client (18, 20, fig. 1) for receiving and presenting the notifications without interrupting client process and providing access to designated sources (see col 4, lines 12-48).

Per claim 9, Aktas teaches provides a receipt confirmation for confirming the delivery and correctness of the message (see col 5, lines 12-16).

Per claims 10 and 15, Aktas teaches identifying recipient for the notification and logging system activities (see col 5, lines 39-53).

Claims 16-27, 32-41 and 46-52 are similar in scope as that of claims 1-10 and 15.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a),

Art Unit: 2154

the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 11-14, 28-31 and 42-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aktas and further in view of Kibre et al, U.S. pat. No. 5,966,691.

Per claims 11-13, Aktas does not teach different providing notification alerts in different formats. The use of various notification formats to inform user of detected events is well known in the art as disclosed by Kibre (see Kibre in col 2, line 34 - col 3, line 47).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Aktas with Kibre's teachings because it would have enabled notifying users different notification alerts with different presentations.

Per claim 14, Kibre also teaches allowing users to configure and customize the system (see Kibre in col 2, lines 58-67).

Claims 28-31 and 42-45 are similar in scope as that of claims 11-14.
